Culture in the modern English classroom. It can simply be about transmitting **content**: literature, trivia, music, culinary oddities. But it can also be about exploring and playing with **language**: politeness strategies, swearwords, spoken idioms, being vague. Or about developing a **skill** in its own right: an autonomous cultural competence and sensitivity. Last but not least, it can be about enriching our repertoire of classroom **techniques**: working with authentic texts, exploiting new technologies, or setting up preparation-free drama activities.

Rather a lot for a single training day? Actually, there's more, with lots of practical tips, ready-mades, and instantly usable ideas, coming from:

Ken Wilson – our keynote speaker

Hanna Kryszewska
